

Maximising long-term returns while minimising short-term risk.

Recommended investment term is 3 years or more.

Capital Growth and Income (Risk Score: 36)

Investment Strategy and Fund Description:

Emperor's Moderate RA Fund invests in a wide range of assets, including money market instruments, shares (equity), bonds, property and commodities - both in South Africa and Internationally. Equity weights are selected based on finding the best value relative to each asset class.

Maximum equity exposure is 60% with no minimum limit. Historically, equity exposure ranged between 40% and 60%. Foreign exposure (excluding Africa) is limited to 25% but within the Medium Equity fund it ranges between 15% and 25%.

The fund is managed to comply with the investment limits governing retirement funds.

The fund is diversified across a range of assets reflecting its objectives of reasonable growth and capital stability. Returns are likely to be less volatile than those of an equity-only fund or a balanced fund (high equity). The fund is tactically managed whereby asset allocation is actively adjusted to protect, grow capital and improve risk-adjusted returns of passive investments.

Fund Objective:

The goal is to offer investment stability and provide capital growth over the medium to long term, while aiming to deliver returns above inflation plus 5% over time.

Investment charges:

Fund Management Fees*: **0.6% P/A (excl VAT)**

**Fund Management fees is a targeted fee over a 3-year annualised period which includes Management Fees levied by EAM, Underlying ETF Total Expense Ratios (TER) as well as transactional costs.*

Suitable for:

Investors seeking a fund that aims to achieve both income and capital growth.

Pensioners and other investors requiring an income, especially those in the early stages of retirement.

Pensioners and other investors requiring an income, especially those in the latter half of retirement.

Trusts, endowments, foundations and charities who require long-term funding with a low to moderate spending rule.

Conservative investors with an objective to accumulate capital over the long term.

** This fund is not suitable for investors seeking to aggressively accumulate wealth over more than 5 years.*
