

1invest SA Bond ETF

Fund information update at 31 December 2023

What is the fund's objective?

The objective of the 1invest SA Bond ETF is to track the S&P South Africa Sovereign Bond 1+ Year Index as closely as possible.

What does the fund invest in?

The fund invests in the constituents of the S&P South Africa Sovereign Bond 1+ Year Index and aims to replicate the Index by holding the same weightings of these constituents. The S&P South Africa Sovereign Bond 1+ Year Index seeks to track the performance of local currency denominated sovereign debt publicly issued by the government of South Africa in its domestic market, with maturities of one year or more. The fund is rebalanced monthly and therefore has minimal trading costs. The fund may also hold a small portion in cash instruments and listed derivatives to effect efficient portfolio management.

What possible risks are associated with this fund?

Risks include default risk, interest rate risks, inflation risk, market volatility, economic and political risk.

Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

What is the suggested investment period for this fund?

Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

Who should consider investing in this fund?

- The fund is a long-term investment aimed at investors with a time horizon of a minimum of three to five years;
- It is suited to conservative investors with a low risk appetite and is fully allocated to domestic bonds;
- This fund is aimed at investors who seek exposure to domestic bonds at reduced cost;
- It is a low-cost alternative to actively managed domestic bond funds.

Income

Distribution Net income is calculated and accrued daily and is declared and distributed quarterly.

Declaration Quarterly, in accordance with the JSE corporate actions timetable.

Regulation 28	Does not apply
Index	S&P South Africa Sovereign Bond 1+ Year Index
Methodology	Replication
Rebalancing	Monthly
	Class A
Launch	05 June 2019
ISIN number	ZAE000265625
JSE code	ETFBND

What are the costs to invest in this fund?

Maximum charges including VAT

	Class A
Annual fee	0.288%
Performance fee	N/A

Annual fee - this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the fund management fee and administration fee. The fee also includes other charges such as audit, custody and index provider fees that are normally additional permissible deductions. Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

This portfolio is an exchange traded fund (ETF). The charges detailed above relate to the portfolio, they do not include the fees for trading on an exchange. Brokerage fees, which are payable when buying or selling an ETF on an exchange, are levied by a broker and may vary depending on the broker used.

Cost ratios (annual) including VAT as at 30 June 2023

	Class A
Based on period from:	01/07/2020
Total Expense	0.29%
Transaction Costs	0.00%
Total Investment Charge	0.29%
1 Year Total Expense	0.29%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Commentary

Fund review

The review of the S&P South Africa Sovereign Bond 1+ Year Index (SPFIZAA) in Q4 2023 saw no changes to the Index. The fund performed in line with the Index. The R186 Government bond remained the largest bond in the fund and its yield decreased from 9.42% to 8.67% and its modified duration decreased from 2.63 to 2.53 over the quarter. The fund's yield decreased from 11.68% to 10.85% and its modified duration increased from 5.70 to 5.75 over the quarter.

Market overview

Globally, the US kept their interest rates unchanged in the December FOMC meeting for the third consecutive time, with the main driver being a cooling economy and the moderating inflation rate, albeit it remains elevated. Consequently, the prospects of a "soft-landing" have become more attainable. Particularly, the Fed signalled that it anticipates three rate cuts over the course of 2024, with economists' expectations pointing to an interest rate cutting cycle that will commence as early as May 2024. The final quarter of 2023 witnessed significant gains in global equity markets. The MSCI World Index surged by 11.1%, complemented by the MSCI EMEA's 8.0% rise. Meanwhile, the S&P 500 concluded the year at a solid 24.2%. Stability characterised the bond markets, with the 10-year US Treasury yield ending the year at 3.9%.

Within South Africa, Q4 emerged as the strongest quarter, boasting substantial gains in local indices, particularly we saw the S&P South Africa Composite Capped Index up 2.50% in December and gains of 8.49% for 2023. This impressive uptick was primarily fuelled by a more favourable December and an improved global risk sentiment. Annual figures reflected positive trends as well, with the Top 40 Index gaining 9.0%, the All-Share Index 9.3%, and the Capped SWIX 7.9%. Additionally, the All-Bond Index recorded a return of 9.7%, while the STeFI registered a gain of 8.0%. Over November 2023, the annual inflation rate came slightly below analysts' expectations of 5.6% and moderated to 5.5% from a five-month high of 5.9% in October. Though this remains elevated, it lies within the SARB's target range of 3% to 6% and served as a signal of the early effectiveness of the restrictive monetary policy stance.

Global economic indicators witnessed a shift in sentiment, especially with the Federal Reserve's adjustment from a hawkish to a more neutral stance, setting a positive tone for the commencement of 2024. Despite this, China's growth remained restrained due to weakened export demand and a downturn in the property sector.

Looking ahead

As the new year unfolds, market expectations revolve around the potential shift in the Federal Reserve's approach towards a more dovish stance. Focus remains on productivity gains and projected improvements in corporate earnings. The market anticipates a possible revaluation of large US companies, driven by increased earnings expectations and momentum, despite an overall forecast of slower economic growth. Moreover, ongoing monitoring of bond yields and expectations for China's growth trajectory are among the pivotal factors shaping future trends. Forecasts for 2024 suggest a cautious outlook for Federal Reserve rate adjustments, leaning towards potential rate cuts based on observed economic trends and inflationary pressures.

Similarly, South Africa's monetary policy hints at potential rate cuts to stimulate the economy, supported by declining inflation figures and a gradual improvement in economic prospects. However, uncertainties linger concerning fiscal challenges and the impact of oil price fluctuations on inflationary patterns. Internally, South Africa's economic performance in 2024 is poised to be influenced by export trends, consumer spending, and investments. Positive signals from declining inflation rates within the SA Reserve Bank's target range offer a favourable backdrop. Renewable energy advancements, particularly in solar imports, are expected to alleviate the persistent issue of load shedding, potentially bolstering business activity.

Important information update at 31 December 2023

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The 1invest SA Bond ETF is a portfolio of the STANLIB ETF Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Absa Bank Limited.

The investments of this portfolio are managed, on behalf of the Manager, by 1INVEST Fund Managers (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 49955, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 17h00. Forward pricing is used.

This portfolio is an Exchange Traded Fund registered as a CIS (CIS-ETF), it is listed on an exchange and may therefore incur additional costs. Participatory interests in a CIS-ETF cannot be purchased directly from the Manager. A CIS-ETF is subject to exchange listing requirements and settlement cycles for equities and all trading in a CIS-ETF is through an exchange. It may take a few days longer to receive the proceeds of a sale of a CIS-ETF than would be the case for a CIS.

This is a portfolio that derives its income primarily from interest-bearing instruments. The yield (if shown) is a current effective yield calculated daily.

This portfolio is a third party named, incubator portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, incubator portfolio is a portfolio bearing the name of the financial services provider (FSP), who intends to apply to the Registrar to be approved as a manager within three years after the Registrar has approved the portfolio, and where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. 1INVEST Fund Managers (Pty) Ltd, an authorised FSP, FSP No. 49955, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 December 2023.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).

Additional information about this product including, but not limited to, brochures, application forms and annual or quarterly reports, can be obtained free of charge, from the Manager and from the Manager's website (www.stanlib.com).
