

## Bidvest Prime Growth Fund B1

31 March 2024

#### **Fund Objective**

The objective of the fund is to produce high capital growth of inflation plus 6% over long periods. The fund is managed in accordance with Regulation 28 of the Pension Funds Act. The fund is managed so as to generate high capital growth with an aim to achieve the best possible investment growth for long-term investors, including retirement savers.

# Risk Profile\* Low Low - Medium Medium - High High

Portfolios in this category are tilted towards a higher equity exposure (both local and international) which could be tantamount to greater fluctuations (volatility) in short-term performances. While statistical analyses of markets' returns indicate that investments in equities (company shares) offer the highest expected returns in the longer-term, it also comes with the highest risk of short-term capital losses. Most investment returns from these portfolios are of a capital (rather than income) nature.

#### Fund Universe

In order to achieve its objective, the fund invests in a broad spectrum of South African and offshore securities, as permitted by legislation.

#### Investment Strategy

The fund invests across all the major asset classes to produce longterm investment returns with an emphasis on capital growth. The strategic allocation to the different asset classes is fixed at optimal weights, although this is managed to protect investments against market risks or to take advantage of asset class mispricing. The underlying investments are managed on a passive basis, ensuring efficient and costeffective returns. The fund is managed to comply with Regulation 28 of the Pension Funds Act; therefore it may hold foreign assets with an exposure of up to 30% of the investment value, with an allowance for an additional 10% for African (exSouth Africa) investments. It may have exposure to growth assets, including equities (up to 75% as a highequity investment) and property (up to 25%).

#### Who should be investing

The fund suits investors with an investment horizon of at least five years who are looking for longterm capital growth ahead of consumer price inflation and who can tolerate the portfolio volatility required to achieve the targeted rate of return of inflation plus 6%.

| Fee Structure                  |       |
|--------------------------------|-------|
| Total Expense Ratio (TER)      | 2,18% |
| Transaction Costs (TC)         | 0,09% |
| Investment Management Fee      | 0,60% |

### Glossary of Terms

Standard Deviation is a statical measure of the dispersion of returns for a given security or market index.

Sortino Ratio measures the risk-adjusted return of an investment asset, portfolio, or strategy. It is a modification of the Sharpe ratio but penalizes only those returns falling below a user-specified target or required rate of return, while the Sharpe ratio penalizes both upside and downside volatility equally.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

**Total Expense Ratio (TER)** is the global standard used to measure the impact that the deduction of management and operating costs has on a fund's value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

**Transaction Costs (TC)** is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

#### Disclaimer

The co-named funds (as defined in BN 778 of 2011) is registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). The manager takes full responsibility for the co-named fund, regardless of any co-naming arrangements. Bidvest Asset Management (Pty) Ltd is the FSCA approved and appointed investment manager of the co-named CIS funds and authorised as a Financial Services Provider. The sub-delegated investment manager for the co-named CIS fund is 10X Investments (Pty) Limited, a licensed Financial Services Provider with FSP Number: 28250. Collective Investment Schemes ("CIS") in securities are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up and past performance is not necessarily a guide to future performance. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. The manager reserves the right to close and reopen the portfolio to new investors from time to time in order to manage them more efficiently and in accordance with its mandate. A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Investment performance is calculated for the portfolio and is for illustrative purposes only. The investment performance may differ for each investor as it is calculated by taking into account the initial fees, the actual investment date, the date of reinvestment of income and dividend withholding tax and all ongoing fees. Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Lump sum investment performances are quoted. Income distributions are in the calculations. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. The daily cut off time is 14:00 for trades and the valuation point is 22:00. Prices are published on Finswitch by 10:00 daily and are also available on request from the manager. This is a Minimum Disclosure Document and a general investor report and should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice. Investors can also obtain additional information on the managers' website and all price related queries or information is readily available on request.
