

Maximising long-term returns while minimising short-term risk. (Risk Score : 52)

Launch date – August 2018

Recommended investment term is 5 years or more.

Investment Strategy Description:

The International Equity Bundle is a moderate to high risk, global, equity portfolio. The objective of this portfolio is to achieve capital appreciation by following a quantitative medium to long term equity strategy investing in foreign markets.

The portfolio is constructed using proprietary ranking and weighting methodologies to select momentum, value and stable shares. Investments to be included in the International Equity Bundle will, apart from assets in liquid form, consist of equity securities and financial instruments and may include listed property. Investments will be primarily in foreign markets but there will be no restrictions on the geographic asset allocation.

**For the period from January 2016 to July 2018, simulated performance is shown. Simulations used market data sourced from Bloomberg. Simulations are generated using rule based algorithms that determine investment decisions. The algorithms analyse the balance sheet and income statements of equities and each assets return relative to other assets. Investment decisions are made on this data using historic comparisons. The simulated performance is calculated taking all fees into account and income is assumed to be reinvested as it is received.
